

James Schramko here recording a special January 2013 inspiration video if you like.

New year's resolution

I know a lot of people talk about what they are going to do with their January New Year's resolution etc. and I think for the most part, that's bullshit. You can do that at any time of the year. You don't have to wait till the first of January to set your resolutions. (And I think statistically a lot of people fail).

Make resolutions any day

Living your dream lifestyle

Now you might observe behind me here is a pool, and this is where I live. The point is that I made a decision many years ago that I wanted to have a lifestyle dictated more by the way I'd like to live and I built my business around that. And I encourage you to do the same thing.

Whether it's January or whether it's July or October, whenever you're watching this start making changes today. It is absolutely possible. I've been learning internet marketing principles and applying them to the online field where I've built real businesses but I was able to do it part time while I had a job.

I got it to a point where it was so successful that I was able to let go of that job, which meant that I'm now building my own business on my own terms. And that's why even on a weekday like today I can sleep in, go and have a massage, get a coffee, have a haircut, eat some lunch,

come home, have a swim and then make a short video like this and we get to call this “work”. But now I’m actually going to go through a few of my emails and that will be my day for today.
